Applicant is advised that should claims 1 to 6 and 13 be found allowable, claims 15 to 21 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 to 3, 13 and 15 to 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Demina et al. (Chemical Abstracts, 117:48472, 1992), cited.

The reference discloses the claimed compound and dye-forming coupler of the formula I and Ia wherein Q together with

Art Unit: 1626

-N-C=N- forms a 4-pyrimidone ring, R_A or R₁₁ is phenyl, Y is hydrogen and X is phenyl. Note the abstract and Registry Number 142267-33-2.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1 to 21 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 to 6 and 13 to 18 of copending Application No. 10/125,548 and claims 1 to 3 of copending Application No 10/669,414 and claims 1 to 28 of copending Application No 10/679,466. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims overlap when in the instant application X is an aryl group or a phenyl group and in application '548 R_A is not a straight-chain alkyl group and in

Art Unit: 1626

application '414 Q in combination with $-N=C-N(R_1)-$ forms a 6-membered ring. The compounds of the copending applications have the same utility as dye-forming couplers or azomethine dyes. One of ordinary skill in the art would have been motivated to make the claimed compounds with the expectation that compounds useful as dye-forming couplers or azomethine dyes would be obtained.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

The references made of record and not relied upon show the state of the art.
